Experience the unprecedented image quality and pointandshoot convenience of Smart AUTO, along with enhanced operability and an intuitive new menu. HD shooting at 1280 x 720 pixels with HDMI output lets you see all the beauty of your HD images and movies on your HDTV.Capture closeup, wideangle shots with stunning 12x optical zoom. HD shooting at 1280 x 720 pixels with HDMI output lets you see all the beauty of your HD images and movies on your HDTV. PowerShot SX200 IS Highlights 12.1megapixel resolution, 12x optical zoom with Optical Image Stabilizer For all its easy operability, the PowerShot SX200 IS has a feature set to be reckoned with. 12.1megapixel resolution delivers a wealth of detail to every image, and allows you to crop and enlarge any portion of your shot freely. With the camera's powerful 12x optical zoom, you'll get up close fast, handy at sports and school events as well as everyday creative shooting. The 28mm wideangle lens captures more in every frame, and gives your photography a professional edge. The PowerShot SX200 IS is equipped with Canon's acclaimed Optical Image Stabilizer Technology that automatically detects and corrects camera shakeone of the leading causes of fuzzy or blurred shots. Even when zoomed in, you can get the steady, crisp, brilliant images you'll be proud to shoot and share. And Canon's Optical Image Stabilizer Technology is so convenient to use. It functions perfectly with or without a flash. Capture Your Best Shots Easily Smart AUTO intelligently selects the proper settings Just set the Canon PowerShot SX200 IS to Smart AUTO and you're ready for maximum enjoyment from your picture taking every time. It's a relaxing and satisfying way to shoot because you can completely concentrate on your subject knowing that the camera has the technical details covered. Advanced Canon technology intelligently analyzes your situation and shooting conditions.

Then it automatically selects an appropriate setting from 18 specially defined settings. So whether you're photographing flowers, a captivating sunset, or your friends at the park, you can be confident that you're getting dramatic, memorable images. Shooting Modes Advanced presets for the best possible photos under certain conditions. With 23 Shooting Modes including 11 Special Scene Modes, you're ready for whatever shot comes your way HD movie shooting capability plus HDMI output The PowerShot SX200 IS lets you record video in beautiful high definition 1280 x 720 pixels. The camera also makes it easy to enjoy HD movies and still photos on your HDTV with an miniHDMI

connector for direct connection to a highdefinition monitor. You'll enjoy the HD experience with no degradation of image or audio in the signal, plus the ability to display up to 130 still images at once. Blink Detection Blinking subjects can ruin the best shots, and the problem usually isn't detected until it's too late to do anything about it. The PowerShot SX200 IS is equipped with Canon's new Blink Detection to combat this common image flaw. The feature uses the power of Face Detection to determine whether any subject in the previous shot had closed eyes. This highresolution screen offers a crisp, clear picture to make shooting, playback and using the camera's menu functions especially convenient. Clear and bright, it also features Night Display for easy viewing in low light. It also has an electronic viewfinder that provides sharp images when you shoot closeup with Super Macro shooting mode. A World of Advantages with Canon's Technology DIGIC 4 Image Processor has evolved Face Detection Technology that tracks the faces of moving subjects and lets the shooter enter the frame seamlessly with the Face Detection SelfTimer. DIGIC 4 Image Processor Canon's most advanced image processor, DIGIC 4, delivers evolved Face Detection Technology that keeps every face in every photo looking its very best.

The technology finds and tracks the faces of moving subjects until you're ready to shoot, then delivers perfect focus. In addition, exposure, flash and white balance are compensated, so that faces exhibit natural skin tones and backgrounds are properly exposed. Using an internal database of thousands of different photos, iSAPS works with the advanced DIGIC 4 image processor to improve focus speed and accuracy, as well as exposure and white balance. A Face Detection SelfTimer automatically detects an increase in the number of faces and makes the appropriate adjustments. For instance, to include the photographer's face in a group shot, there's no need to rush in. Just put the camera on a stand or tripod, specify Face Detection SelfTimer, and the camera will wait for the photographer's face to get oncamera before it takes the shot. Motion Detection tracks moving subjects in a much larger range, and the Servo AF retains focus on a moving subject after the shutter button is pressed halfwayallowing you to wait for the perfect shot without refocusing. Intelligent Contrast Correction DIGIC 4 also makes possible the iContrast Intelligent Contrast Correction system, which controls the compensation level in pixel units to brighten dark areas while leaving bright areas unchanged for better images where the main subject is dark, and more natural transition. The PowerShot SX200 IS can even use iContrast in playback mode to adjust images that were shot without the setting activated. Redeye Correction provides three options for removing redeye from subjects in flash pictures. 1 Redeye Correction during shooting actually identifies and corrects redeye in human subjects as pictures are taken. 2 The PowerShot SX200 IS can be set to automatically detect and correct redeye during image playback. 3 You can manually locate any red eyes in a scene during image playback on the LCD screen, and command the camera to remove them. Life doesn't give you second chances to capture special times.

That's why the PowerShot SX200 IS features an ISO 1600 setting that reduces the effects of camera shake and sharpens subjects in lowlight situations, giving you greater shooting flexibility. ISO can be expanded to 3200 when you select ISO 3200 Special Scene mode. Whats in the Box PowerShot SX200 IS body Lithiumion battery pack NB5L Battery charger CB2LX Wrist strap WSDC9 Digital Camera Solution CDROM USB interface cable IFC400PCU AV cable AVCDC400 Amazon calcula la calificacion de estrellas de un producto utilizando un modelo de aprendizaje mecanico en lugar de un promedio de datos sin procesar. El modelo de aprendizaje mecanizado toma en cuenta factores que incluyen la edad de una resena, los votos de ayuda de los clientes y si las opiniones pertenecen a compras verificadas. Vuelva a intentarlo en otro momento. Im a mom who wanted a great camera for photos of my kids, of landscape scenes, and to capture special moments. I, like most, did quite a bit of research on cameras prior to this purchase. I had been very happy with my old Canon Powershot S500 that has lasted me for 56 years and was partial to the Canon brand. That didnt stop me from checking out other brands, however. My main goal was to find a camera with a great zoom. Im no professional with the camera and really dont need a lot of fancy extras. I know enough to take some

good pictures in various lighting settings, but I can do without a digital SLR and prefer to do so. I initially was led to the Canon SX 110 IS, again mainly due to the zoom and the Canon name. The more I looked at it the more I realized I didn't want the clunkiness of it. I do a lot of hiking and I'm a mom who likes to carry a small purse, so I wanted something easy to tote. I began my search again looking for a camera that had that portability factor as well as the megazoom. I finally found it in this camera. I have had the camera less than a month and have already been amazed at the photos I have been able to produce.

Even in low light settings the pictures come out clear and sharp. I was able to take some great shots of my daughter on stage from a dark audience at well over 60 feet away. I had a man behind me ask what type of camera I was using because he was so impressed with the shots he had seen on my camera that he was going to run out that night and buy one. I also like the fact that this camera uses a rechargeable lithium-ion battery. I didn't like the idea of going through dozens of regular AA batteries, regardless of how convenient they are. That was another factor in me not purchasing the SX 100 IS. I did buy an extra battery for this camera, just in case, and would highly recommend doing so. I also ended up with a 16 GB memory card, much more than necessary but again, peace of mind. It is well worth the time to read the manual for this camera. You will find that the added features are quite simple, but I have to say the auto mode takes incredible photos. All in all, this is one smart camera. The zoom is simply amazing and the stabilization allows clear, sharp pictures to come through. The face detection is a great feature that works well in action shots. The huge 3 inch LCD screen will ensure you get a fabulous shot. I was one who used to depend on a viewfinder and it has taken me some time to get used to not having one, but this large screen does help. The popup flash does take some getting used to as well, but I have yet to find it awkward or uncomfortable in any way. I am not one to use a camera for video features. We have a great Sony camcorder that we use for that purpose solely, so I can't be fair in reviewing that feature. I think this camera would serve a wide range of photographers. The ease of use and the quality delivered by Canon ensure that regardless of your purpose, the pictures will come out fantastic, which is the ultimate goal of any of us. I have been consistently impressed and satisfied with the cameras.

I got this to replace a very wellbuilt Canon A620. I'm a basic camera user. I like taking pictures and videos, but I'm not a good enough photographer to worry about the minor details and settings. This camera is pretty good at taking pictures on Automatic, and the scene settings are great. I usually get some arguably amazing pictures, but that's mostly thanks to Canon's cameras more than my skill. But conversely, I sometimes get some pretty bad ones, usually due to waiting for a camera to respond or set up a shot, or just Automatically choosing a wrong setting. Though I'm sure if I took the time to learn more, I could eliminate some of these problems. I really only use Auto or Night, but if I did choose to go more in-depth, I'm sure the details would be fantastic. Pros The zoom is spectacular. 12x OPTICAL zoom is amazing. Very good night pictures, even on Auto Colour is vivid and beautiful Automatic Macro focus is sometimes very useful The HD video is great. I mean it's no Planet Earth quality video, but my first camera had 15fps 480x320 video, so this is a huge improvement Photo storage is efficient. I can save many more pictures and much more video per GB than on previous cameras, even set at 720p video Survived a 1m fall, with no noticeable damage Cons I frequently find myself wishing I could force a flash in Automatic mode The manual settings are difficult to use, even to try to force a flash It's easy to automatically move the scene dial, which sometimes means being in unfamiliar settings Automatic focus isn't as good in lowlight situations Auto focus also isn't too good in Macro with zoom. Macro is best used up close Neutral The camera is bigger and bulkier than I had expected, but is not terrible. It's just small enough to fit in my jeans pocket, but is a tight fit. Battery life is good. I haven't had a chance to go anywhere touristy yet, but it lasts probably a whole day under moderate-heavy use.

I prefer cameras with AA batteries which I can replace on the fly and not have to wait to recharge. A

second battery would partially solve that problem I suppose. Overall, a solid camera that provides great results. Definite recommend to anyone who wants a great camera and cant yet afford or justify a DSLR.
