Davyd Cherrybrook 2 reviews 1 like It worked well for about 5 years until the problem started. Ice layer started forming at the bottom of the freezer. Defrosting did not help. I called the customer support, but they were totally useless.

It is a disgrace; all they can do is to tell you to call a technician. I did not want to pay a technician after reading all these stories of how they have no clue how to fix the problem, but always ready to charge. Anyway, I fixed it myself. It is actually very simple if you know how a fridge works. I hope someone will find it useful. Here is my article Date Purchased Jul 2011 1 like Share More Similar opinion.I think its about 67 years old, but has been giving us grief for years. Its time to GO! Date Purchased Nov 2010 1 like Share More Similar opinion. Compare all Carl Adelaide 3 reviews 1 like The fridge has for the most part worked to an acceptable standard with regard to temperature. However, the noises this fridge makes demonstrate the poor design and manufacturing standards. The compressor is not the source of the noise problem. When the unit defrosts it makes very loud cracking noises and each time after the compressor turns off there are loud gurgling noises and noises similar to a slow leak from a balloon which continue for sometime. Extremely irritati. Read more ng in a usually quiet home. I am not surprised the model has been discontinued, a very poor offering from Bosch and definitely a brand killer for me. My advice for anyone reading this is do your research before buying. Date Purchased May 2013 1 like Share More 1 comment Bosch H. Write a review on ProductReview.com.au ! hayleybrooks 2 reviews 3 likes Like all other reviewers, I have had my crisper drawers ice up wasting too much valuable food. I started having this problem within a week of owning this fridge but managed to get around it by placing a plastic chopping board at the bottom of each drawer to insulate the veggies. While this has worked, it comes at a price. To avoid the draws from icing up even with the extra insulation, you have to have the settings quite low which means that nothing is ever very cold. Its lucky that wer. Read more e vegetarians in our house

because I don't think you could keep meat fresh. The handles on this fridge are also annoying. For a couple of years now, we've had to routinely tighten the screws that hold them on as they constantly loosen. The handles are very flimsy anyway, they are cracked and look shabby. All of these things we have lived with and just tried to ignore but now, I'm fed up. While trying to get something out of bottom freezer draw this morning, a new major problem has arisen. The draw seemed stuck on one side so I gave it a tug and a piece of the draw snapped off and has sliced my hand open!!! I managed to free the draw and realise now why it wouldn't open, it was frozen to the floor of the freezer. For some reason, there was a 1cm thick sheet of ice in there. I'm really disappointed with this fridge, especially with its mighty price tag. I only replaced my perfect 10 year old white LG one because I wanted to update to a stainless model, what a mistake. The name Bosch always conjured ideas of quality, now I'm not so sure. Since owning this fridge with only moderate treatment, we have a broken chiller safe, cracked lower door bin and now a very broken freezer door not to mention a bleeding hand!. This was an expensive fridge to start with, now I'm going to have to shell out to fix and replace these items too.
